Your personal information will be retained by us only as long as it is needed, or to meet any legal, regulatory or tax requirements.

V) DATA TRACKING

Cookies

To facilitate and customize your experience with us, we may store cookies on your electronic devices. A cookie is a small text file that is stored on a user's electronic device for record-keeping purposes which contains information about that user. We use cookies to save your time while using the Platform, remind us who you are, and track and target your interests in order to provide a customized experience. Cookies also allow us to collect non-personally identifiable information from you, like which pages you visited and what links you clicked on. Use of this information helps us to create a more user-friendly experience for all visitors. Most browsers automatically accept cookies, but you may be able to modify your browser settings to decline cookies. Please note that if you decline or delete these cookies, some parts of the Platform may not work properly.

Session Data

We may automatically log generic information about your computer's connection to the Internet, which we call "session data", that is anonymous and not linked to any personal information. Session data consists of information such as the IP address, operating system, type of browser software being used by you and the activities conducted by you on our Platform. An IP address is a number that lets computers attached to the Internet, such as our web servers, know where to send data back to the user, such as the pages of the site the user wishes to view. We collect session data because it helps us analyze things such as the items visitors are likely to click on most, the manner in which visitors click preferences on our Website, number of visitors surfing to various pages on the site, time spent by the visitors on our Website and frequency of their visit. It also helps us diagnose problems with our servers and let us better administer our systems. Although such information does not identify any visitor personally, it is possible to

determine from an IP address a visitor's Internet Service Provider (ISP), and the approximate geographic location of his or her point of connectivity.
